My NASA Data Presents Earth System Data Explorer to 53 Educators at ESIP Workshop
Elizabeth Joyner and PI: Dr. Kevin Czajkowski
My NASA Data, GLOBE Mission Earth
7/5/2020

The two-day teacher workshop featured NASA, NOAA, and university partners as they showcased Earth Science data visualization tools and resources. Teachers in attendance were middle science through university level educators who are interested in incorporating authentic data in the classroom.

See comments from participants:

- The Earth System Data Explorer is a great tool for accessing NASA data; but don’t take our word for it.
- "I love that there are data at my fingertips and all the lessons and mini lessons that are available for me to use."
- "I love how much data there are, and how flexible the interface is, while providing a few more guardrails than Giovanni."
- "Large number of resources. Easy to create data visualizations."
- "Ease of use, depth of data, functionality"
- "I like the data models that my students can make."
- "...For remote learning, I can [teach students to use the tool] just the way you guys did it."
