Climate Change in My Community Workshop ~ Braiding Western and Indigenous Science

Arctic & Earth STEM Integrating GLOBE and NASA meaningfully engaged 35 participants from 9 states in a 5-day climate change monitoring & stewardship training, June, 2019.

- 14 Teams of educators & community knowledge holders (9 Indigenous communities)
- 1 Youth Cohort (5 Indigenous students)
- 17 GLOBE Protocols + Learning Activities
- Culturally Responsive Curriculum

Participant Quotes

- This has been the best GLOBE training I have been to. (From educator in GLOBE international network since 2001)*
- [This project] does so many incredible things in the right way, to continue to try to do what's best for our kids. (From participants)*
- This has given me a new spark in science that I almost forgot I had in me. (From participants)*
