# My NASA Data Presents NASA Earth Science Resources to North Dakota Teachers

My NASA Data (MND) educator, Elizabeth Joyner, presented to 25 elementary through college-level teachers during the virtual *NASA-in-the-Classroom* Professional Development Workshop on August 11, 2020 sponsored by the North Dakota Space Grant Consortium and United Tribes Technical College. Elizabeth featured MND resources that help teachers differentiate instruction about Earth systems phenomena in distance learning and face-to-face environments. She also modeled a variety of MND resources such as mini lessons, Story Maps, Scientifically-Interesting Stories, and other NASA assets that incorporate data and address Three-Dimensional Learning in the Next Generation Science Standards.
