Dual Anonymous Peer Review for Astrophysics General Observer General Investigator Programs.

Dear Colleague.

NASA is strongly committed to ensuring that the review of proposals is performed in an equitable and fair manner that reduces the impacts of any unconscious biases. To this end, and motivated by a successful pilot program conducted for the Hubble Space Telescope over the next year, Astrophysics General Observer General Investigator G O/GI programs will convert to dual anonymous peer review, in which not only are proposers unaware of the identity of reviews, but the reviewers do not have explicit knowledge of the proposing teams and institutions.

The following table provides a timeline for the implementation of dual anonymous peer review for Astrophysics G O/GI programs:

Program Title	Anticipated Proposal Due Date	Format
NICER Cycle 2	11/13/2019	Traditional
TESS Cycle 3	1/16/2020	Traditional
NuSTAR Cycle 6	1/24/2020	Dual-Anonymous
Fermi Cycle 13	2/19/2020	Traditional
Hubble Cycle 28	3/4/2020	Dual-Anonymous
Chandra Cycle 22	~ 3/2020	Traditional
Swift Cycle 17	~ 9/2020	Dual-Anonymous
NICER Cycle 3	~ 11/2020	Dual-Anonymous
TESS Cycle 4	~ 1/2021	Dual-Anonymous
NuSTAR Cycle 7	~ 1/2021	Dual-Anonymous
Fermi Cycle 14	~ 2/2021	Dual-Anonymous
Hubble Cycle 29	~ Spring 2021	Dual-Anonymous
Chandra Cycle 23	~ 3/2021	Dual-Anonymous

NASA understands that dual anonymous peer review represents a major shift in the evaluation of proposals and is committed to ensuring a smooth transition for the proposing community. Over the coming months, NASA SMD will summarize what other ROSES programs outside of G O/GI will adopt dual anonymous peer review, release detailed documentation to the community, and will host a virtual town hall in early 2020 to discuss dual anonymous peer review.

Astrophysics

missions will host additional documentation and guidance, and the mission Science Operations Centers will assist proposers with specific questions.

Sincerely,

A handwritten signature in blue ink, appearing to read 'P. Hertz', with a long horizontal stroke extending to the right.
