# Infiniscope

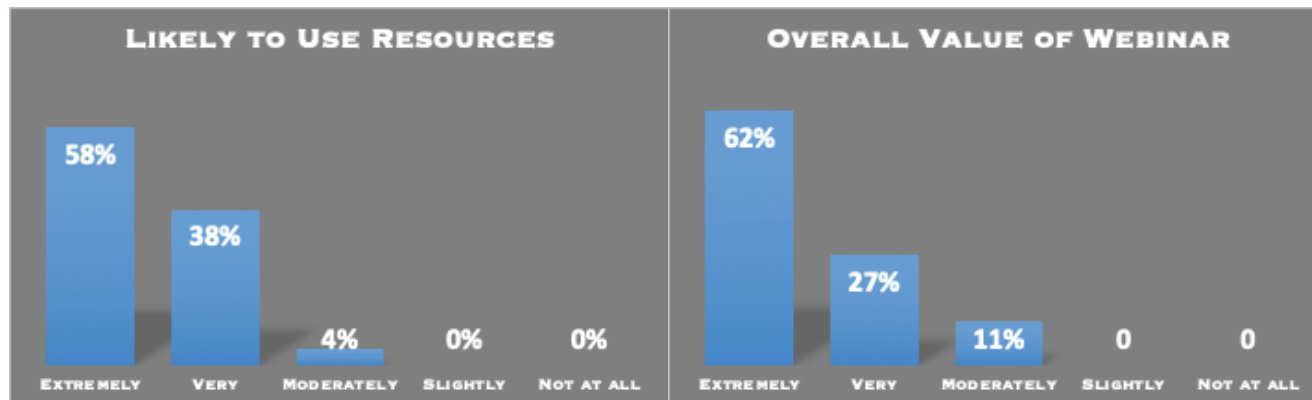

On April 22, 2020 the [Infiniscope](#) team hosted an Online Learning eXchange in response to the COVID-19 needs voiced by [Infiniscope community members](#) as they move classes online.

The eXchange featured free resources that educators could use immediately, including 15 panelists from the Science Activation Network and other agency members.

160 participants registered, 68 attended live, 12 via recording which continues to be available [OnDemand](#).

Positive feedback from our Infiniscope OLeX catalyzed a similar exchange for [American Geophysical Union](#) and their membership.

## Online Learning eXchange (OLeX)

**“I think the topics covered today were useful to informal educators as well as school teachers.”**

**“So many wonderful resources!”**

**“I LOVED the presenters and the variety.”**

**“I liked the range of free resources and the quick overview of each resource.”**
