The Present and Future State of NASA's Citizen Science Program

AGU FALL MEETING TOWN HALL TH028

<https://agu.confex.com/agu/fm20/meetingapp.cgi/Session/104416>

Friday, December 4, 2020
10–11 a.m. EST • 7–8 a.m. PST

Presenters:

Ved Chirayath NASA Ames Research Center

James L. Green NASA Headquarters

Marc Kuchner NASA Goddard Space Flight Center

Elizabeth A. MacDonald NASA Goddard Space Flight Center

Maria Santos NASA Headquarters

From conducting projects designed to study our planet's biodiversity to studying the Sun and finding planets outside our solar system, NASA-funded citizen science projects harness the collective strength of the public to analyze data and conduct scientific research. NASA-funded citizen science projects have engaged roughly 1.5 million volunteers and resulted in numerous scientific discoveries. This town hall provides an opportunity for American Geophysical Union (AGU) researchers to learn about NASA resources available to help launch successful citizen science projects. NASA-funded researchers will also share the latest and greatest information regarding popular NASA-supported citizen science projects.

Office of the Chief Scientist
