# My NASA Data *Springs into Green* With EPDC Phytoplankton Webinar

On May 14, 2020, My NASA Data's Elizabeth Joyner and Dr. Bradley Hegyi presented virtually to 52 educators through NASA STEM Engagement & Educator Professional Development Collaborative on the topic of global phytoplankton distribution. Dr. Brad Hegyi explained the Earth system science connections affecting phytoplankton distribution while Elizabeth Joyner presented the variety of educational resources on this topic available through My NASA Data (i.e., mini lessons, story maps, lesson plans, GLOBE connections, etc.).

The collection of phytoplankton resources are accessible by visiting this [link](#). The phytoplankton story map and mini lessons can be easily integrated with Google Classrooms.
