

Government Performance and Results Act/ Modernization Act (GPRAMA) Annual Performance Report Process

- There are three Annual Performance Indicators (APIs) in NASA's Annual Performance Plan against which the committee is asked to assess progress:
 - API HE-17-1 Demonstrate planned progress in exploring the physical processes in the space environment from the Sun to Earth and throughout the solar system.
 - API HE-17-2 Demonstrate planned progress in advancing understanding of the connections that link the Sun, Earth and planetary space environments, and the outer reaches of the solar system.
 - API HE-17-3 Demonstrate planned progress in developing the knowledge and capability to detect and predict extreme conditions in space to protect life and society and to safeguard human and robotic explorers beyond Earth.

GPRAMA Rating Definitions

Code	Guidelines for Science Ratings
GREEN	Expectations for the research program fully met in context of resources invested.
YELLOW	Some notable or significant shortfalls, but some worthy scientific advancements achieved.
RED	Major disappointments or shortfalls in scientific outcomes, uncompensated by other unusually positive results.
