# GLOBE Mission Earth Attends Data Literacy Professional Development

GLOBE Mission Earth (GME) members participated as a team in Dataspire's Summer Data Literacy Series. Tracy Ostrom (West Ed/UC Berkeley), Elizabeth Joyner (NASA LaRC/My NASA Data) and Angela Rizzi (NASA LaRC/My NASA Data) attended. The group participation was designed to inform consistent efforts across GME related to best practices in support of teachers and students with data literacy. The series consisted of seven interactive webinars exploring a variety of topics that provided concrete strategies to scaffold data literacy skills across grade levels. The team will collaborate on new resources using the best practices gained from the sessions.

## Developing Claim-Evidence-Reason Capability
