**Patron Experience Pilot (PEP) Training: A Librarian
Workshop in Preparation for a Year Long Project
on Interest Development**

Jessica Santascoy
NASA@ My Library Project Manager
3/27/2020

- Three *NASA@ My Library* partners are part of PEP in 2020 (Tom Green County, TX; Show Low, AZ; and Gwinnett County, GA)
- On Feb. 19-20, librarians from all three libraries attended a training on PEP with the *NASA@ My Library* PEP project team at the Tom Green County Library in San Angelo, TX
- Training included the research behind interest development with Dr. Amanda Durik (Northern Illinois University) and how a library display can trigger interest in Earth, space, and NASA Science
- Partner libraries received all the items for a PEP display in their own library that they will manage, contribute to, and collect data from over time to help determine best practices for such displays in a library setting.

A new PEP display in the Tom Green County Library (left); librarians and *NASA@ My Library* project team at the PEP training in a green screen (center); trivia questions in both English and Spanish on the display that trigger a tally counter when a flap is lifted (right).
