

## *SPACE EXPLORATION ENGINEERING*

### ABOUT US

#### ✦ **EXPERIENCED TEAM**

The combined experience of the SEE team encompasses commercial, civil, defense, and international missions operating in LEO, GEO, lunar/cislunar orbit, and deep space. SEE team members have supported all aspects of flight dynamics operations including mission design, navigation, and software development.

#### ✦ **FULL LIFECYCLE SUPPORT**

SEE supports customers at any and all stages of the project lifecycle. From concept development to system design to operations – SEE works for and alongside flight project teams. SEE has trained flight dynamics operators, performed independent verification and validation, led on-console flight dynamics operations, and supported mission concept development.

#### ✦ **FLEXIBLE STAFFING**

SEE tailors staff availability to meet customer needs. Support scales from one or two analysts during early mission phases up to full FD support teams during operations.
